OPEN WATER DIVER

How it works:

Regardless of which version of the PADI Open Water course you take, it is a 4-stage process to become certified:

THEORY - You complete PADI eLearning at home, in your own time, and then you review it together with your Instructor prior to your course starting.

EQUIPMENT - You must have your own Mask, Snorkel, Boots & Fins for comfort & hygiene purposes.

POOL TRAINING - Working in the calm and safe waters of a swimming pool, your training begins with you learning the basic techniques of Scuba Diving.

OPEN WATER TRAINING - Open Water training dives are where you put the skills you learned in the pool into practice in the "real world" and start exploring the underwater world.

As soon as your open water training dives are approved by your instructor you will be a certified diver. PADI Open Water Diver certification is recognized worldwide so your diving experiences will be limitless.

Pre-requisites:

- Minimum age to take the PADI Open Water Diver course with Aquatic Adventures is 12years old.
- Review the PADI Medical Statement and, if required, get a Diving Medical to ensure you are safe to dive.
- You will be required to complete a 200 metre swim (any stroke, no time limit), and a 10 minute float/tread at the beginning of your course to prove your comfort level in the water.
